

RESULTS FOR Mc-Cabe SOLVER USING USER INPUTS

User Input 1 –

```
--- McCabe-Thiele Plotter ---  
Enter mole fraction of feed (xf): 0.6  
Enter mole fraction of distillate (xd): 0.95  
Enter mole fraction of bottoms (xw): 0.1  
Enter Reflux Ratio (R): 2.5  
Enter Feed Condition (q) [1 for sat. liquid, 0 for sat. vapor]:1  
Enter Relative Volatility (alpha): 2.5  
>>
```

Graphical Result –

From the Graph we can observe,

- No of Graphical Stages – 8
- Position of the Feed plate(from top) – 4

User Input 2 –

```
--- McCabe-Thiele Plotter ---  
Enter mole fraction of feed (xf): 0.7  
Enter mole fraction of distillate (xd): 0.9  
Enter mole fraction of bottoms (xw): 0.2  
Enter Reflux Ratio (R): 2.4  
Enter Feed Condition (q) [1 for sat. liquid, 0 for sat. vapor]: 1  
Enter Relative Volatility (alpha): 2.5  
>>
```

Graphical Result –

From the Graph we can observe,

- No of Graphical Stages – 5
- Position of the Feed plate(from top) – 2
